

Jquery 1

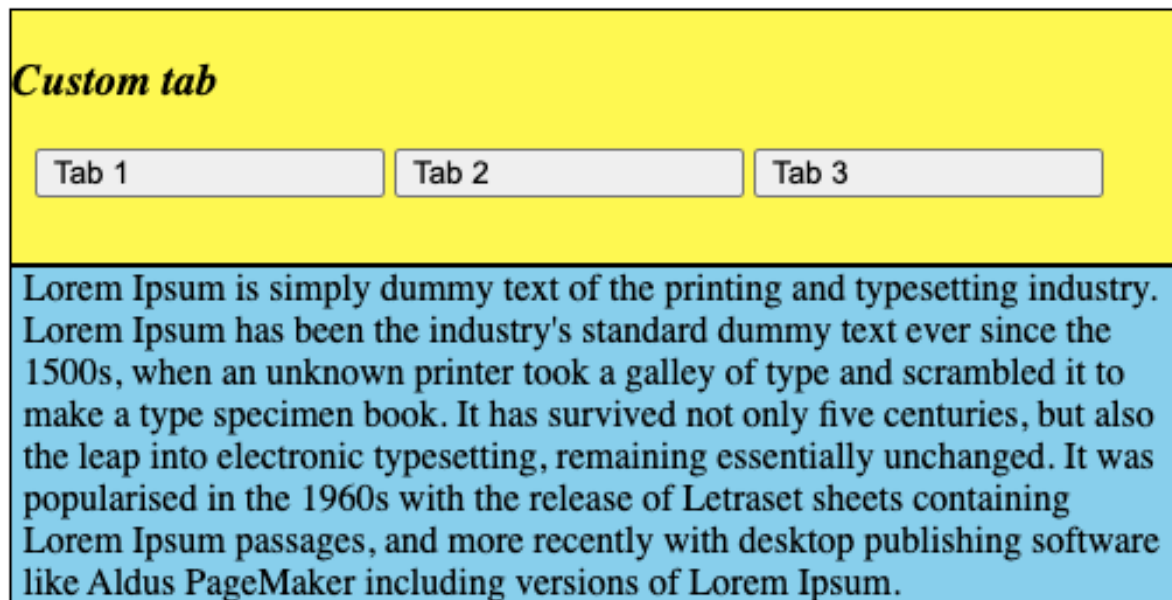

Ex1:

Using jQuery implement tab component shown on the images:

When loading the page:

Tab 1 selected:

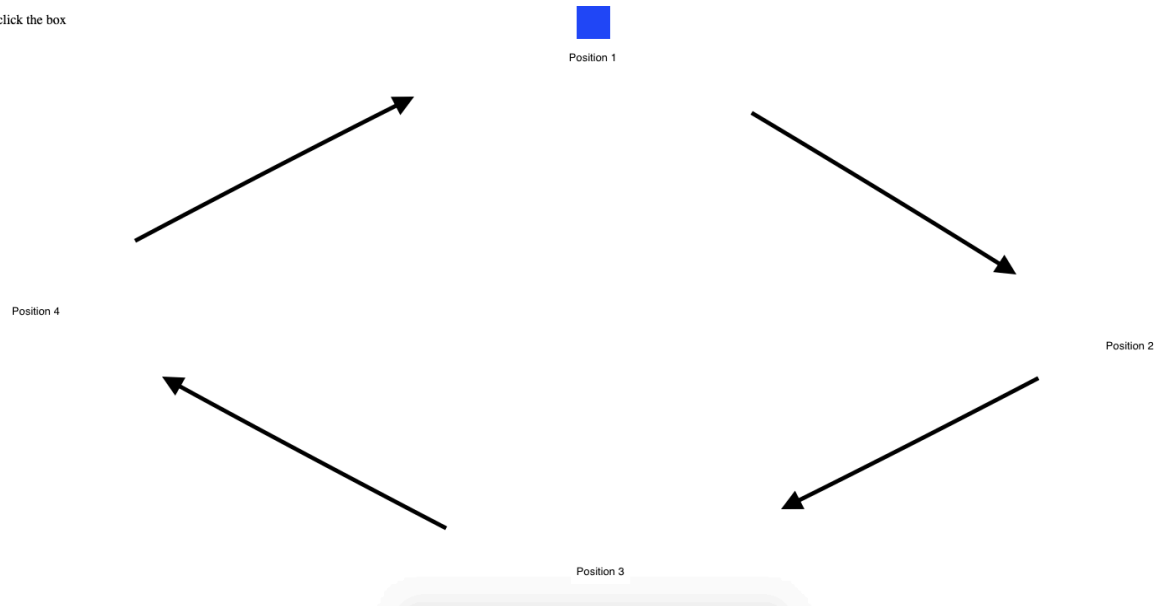

Different tab clicked shows different text content.

Ex2:

Using jQuery .animate(), make animation for element to change 4 positions when clicking on it. Initially the element is in **position 1**. When clicked, the element goes to **position 2** then to **position 3** then to **position 4** and goes back to **position 1**.

Hint: Also try to use the .width(), .height() and .offset() jQuery functions.

click the box

Ex3:

Create the components on the image:

Font size

Initial Increase Decrease

By clicking the "Increase" button, the text font should increase by a factor of (eg X1.2). Analogously, by clicking the "Decrease" button you should reduce the font by a certain factor(ex 1.2). The reduction should also be animated. By clicking the "Initial" button set the font size to default starting value.

By clicking the "Increase" button, the text font should increase with animation by a factor of (eg X1.2). Analogously, by clicking the "Decrease" button you should reduce the font by a certain factor(ex 1.2). The reduction should also be animated. By clicking the "Initial" button set the font size to default starting value.

Initial:

Font size

Initial Increase Decrease

By clicking the "Increase" button, the text font should increase by a factor of (eg X1.2). Analogously, by clicking the "Decrease" button you should reduce the font by a certain factor(ex 1.2). The reduction should also be animated. By clicking the "Initial" button set the font size to default starting value.

Increasing font size:

Font size

Initial Increase Decrease

By clicking the "Increase" button, the text font should increase by a factor of (eg X1.2). Analogously, by clicking the "Decrease" button you should reduce the font by a certain factor(ex 1.2). The reduction should also be animated. By clicking the "Initial" button set the font size to default starting value.

Ex4:

Create page with one input and 6 paragraphs with text inside.

When user insert text in the input, add background color grey to every odd paragraph in the page. With every next keypress on the input check if the length of user text is between 2 and 9. If so, on every keypress change the background color of the page to random color.

Default desing:

Lorem Ipsum is simply dummy text of the printing and typesetting industry.

Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like)

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout.

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable.

After one character inserted:

Lorem Ipsum is simply dummy text of the printing and typesetting industry.

Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like)

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout.

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable.

Every next input should generate random background color for the document until the length is ≤ 9 :

Lorem Ipsum is simply dummy text of the printing and typesetting industry.

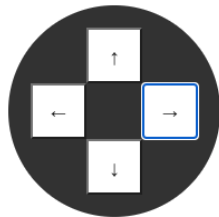

Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like)

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout.

There are many variations of passages of Lorem Ipsum available, but the majority have suffered alteration in some form, by injected humour, or randomised words which don't look even slightly believable.

Ex5:

Create design similar with the image below:

With every left arrow click:

You should move the box to the left by 40px and increase the font size by 2px.

With every right arrow click:

You should move the box to the right by 40px and decrease the font size by 2px.

With every up arrow click:

You should move the box to the top by 40px and increase the opacity by 0.1.

With every down arrow click:

You should move the box to the bottom by 40px and decrease opacity by 0.1.

Example image of moving down and decreasing opacity:
